SUMMARY

Full-stack developer enthusiast — a 5th-semester Informatics Engineering student with proficiency in Laravel, ASP.NET, and PHP for backend development, as well as React.js, Vue.js, HTML, and CSS for frontend development. Solution-oriented, a fast learner of new technologies, and ready to contribute effectively within a software development team.

PROJECT

Backend Developer at MailDesk

May 2026 – Present

- Developed backend services for a mail archiving and disposition system, including structured document filing with a systematic numbering scheme for fast retrieval.
- Built automated, role-based disposition workflows that route incoming letters through the approval chain without manual assignment, streamlining document distribution.
- Implemented a search and filtering system enabling users to locate archived documents in seconds through comprehensive query parameters.
- Designed disposition tracking features to monitor document status and follow-up transparently across all users.

Backend Developer — SARPRA Room Booking System

February 2025

- Designed and developed a RESTful backend API for a room booking management system (SARPRA) using ASP.NET Core 8 and MySQL, including full CRUD functionality and schedule conflict validation to prevent double bookings.
- Built and documented the API using Entity Framework Core and Swagger (OpenAPI), ensuring maintainable and well-structured endpoints.
- Tech Stack: ASP.NET Core 8, Entity Framework Core, MySQL, Swagger.

Frontend Developer — SARPRA Room Booking System

February 2025

- Built a responsive web interface for a university room booking system as part of a coursework project, enabling students and staff to browse room availability and submit booking requests.
- Developed reusable UI components with React and Vite, integrating them with the backend REST API for real-time room and booking data.
- Implemented client-side form validation and booking status display to improve user experience.
- Tech Stack: React, Vite, REST API integration.

WORK EXPERIENCE

Internship at PT Otak Kanan

November 2023 – April 2024

Backend Developer

- Developed and maintained backend APIs for multiple client websites, ensuring reliable data handling and integration with frontend applications.
- Designed RESTful API endpoints to support various website features, collaborating with the development team to meet project requirements.
- Tested and debugged API functionality to ensure stability and performance across different projects.

EDUCATION

Electronic Engineering Polytechnic Institute of Surabaya (EEPIS)

August 2024 – Now

Department of Informatics Engineering (D4)

- Major in Informatics Engineering.
- Currently pursuing degree (expected graduation: 2028).

July 2021 – June 2024

SMK Telkom Malang
Software Engineering (RPL)

- Graduated with a Laravel Skill Certification, achieved “Very Competent” predicate.

CERTIFICATION

Laravel & Vue JS Skill Competency — DOT (Talent Manager)

- Certificate of Competency, achievement level: “Very Competent”.
- Certificate No. ID/DOT/20231206/D0002_249 | Registration No. UKK.30.229.

Competency Certification in Software Engineering (RPL) — SMK Telkom Malang / Telkom Schools

- Passed the Skills Competency Test (UKK) for Software Engineering, specializing in Web Application Development using Laravel & Vue JS.
- Certificate No. 1258/KUR/KL/TS-MLG/XII/2023 | Registration No. UKK.RPL.30.020.

ORGANIZATIONAL EXPERIENCE

LKMM TD PENS

April 2025

- Completed an advanced student management training program focused on event and organizational management skills.
- Learned structured approaches to planning, coordinating, and executing organizational activities and events.

LKMM PRA TD PENS

October 2024

- Completed a student management training program focused on self-management, including defining personal vision and mission for the academic journey.
- Developed understanding of risk, consequences, and decision-making through structured self-reflection.
- Conducted self-assessment using SWOT analysis to identify personal strengths, weaknesses, opportunities, and threats.

Informatics Engineering Student Association (HIMIT) — Young Staff, PSDM Department

Present

- Supported the department’s programs in student development, contributing to planning and coordination of member activities.

OB Dynamic HIMIT PENS — Event Person In Charge (PIC)

Present

- Led event execution aimed at connecting new students with alumni and external student communities.
- Coordinated event planning and execution to strengthen networking between current students, alumni, and outside student organizations.

ADDITIONAL INFORMATION

Technical Skills: Backend Development, Front-End Development
Programming Languages: PHP, HTML, CSS, React JS, Tailwind, Java, SQL
Soft Skills: Communication, Teamwork, Adaptability
Software / Tools: Cisco Packet Tracer, Visual Studio Code
